# Social Housing Register Profile: Timeseries, Local Government Authority

Moreton Bay Regional Council

All

Source: Social Housing Register, accessed at [data.qld.gov.au](http://data.qld.gov.au). The Social Housing Register records all applicants who meet the eligibility for social housing. 1) In 2019-20, the department implemented new technology information systems which has resulted in some changes to data structures and coding. Data comparison across years may be impacted, particularly for households including persons with an identified disability. Since 2019, the department has classified all new applicants on the register as very high need. 2) Local Government Authority and State Electorate are determined based on the applicant's first locational preference.

To minimise the risk of identifying individuals, a technique known as perturbation has been applied to randomly adjust cells. For this reason, discrepancies may occur between sums of the component items and totals, and data may not match other published sources. Clients are assigned to a region based on where they lived in the week before presenting to an SHS agency. Clients are assigned to only one region, based on the location details provided in their first support period in the reference year. Yearly client counts should not be summed to derive longitudinal client counts because clients can access services in multiple years. For further information on data items and definitions, please see the data cubes user guide:

# Median Rent by LGA and Dwelling Type

Median value of weekly rent by Dwelling type and Local Government Area

Source: Residential Tenancies Authority (RTA), Queensland Government. Median value of weekly rent paid for new tenancies commencing in each quarter. Accessed: <https://www.rta.qld.gov.au/forms-resources/median-rents-quick-finder/median-rents-quarterly-data>. Median rents data is available each quarter on new rental bond lodgements to determine median weekly rental prices for houses, townhouses and flats/units across Queensland. A median is the middle number of a series of numbers that are ordered from smallest to largest, and it is used rather than averages as medians are not affected by unusually high or low values. The breakdown of this data includes rent prices by suburb, postcode, Local Government Area (LGA), and the whole-of-Queensland. This information is based on the total number of bonds lodged and held by the RTA. The RTA recommends that for accurate comparison, data should be compared year-on-year rather than quarter-on-quarter. Additional information on datasets and release notes can be found on the RTA website. Dwelling types include: Flats/units, Houses, and Townhouses and 'All dwellings'. Bedroom counts are displayed as 1, 2, 3 or 4 bedrooms depending on data availability.

Notes: State Penalties Enforcement Registry (SPER) debts can start with unpaid fines and penalties, and can be referred to SPER by various agencies: courts, state government and other local government authorities. This data shows a breakdown of all types of debt registered with SPER, reported as at a current point in time (based on extract date). This data is a breakdown of the outstanding debt based on current debtor addresses. As debtors may have multiple addresses registered with SPER, the allocation of debt to an SA4 region is based on their most current address available. It is possible that some debt may be reported under different SA4 regions over time, due to debtor relocation or identification of new address information by SPER. Figures are reported using the Australian Statistical Geography Standard (ASGS) Postcodes to Statistical Area Level 4 correspondences tables (Source: Australian Bureau of Statistics Cat. No. 1270.0.55.006). Where no Statistical Area Level 4 is available for a postcode, it has been listed as "Other QLD". Populations vary significantly between SA4 regions. This data does not account for differences in population and caution should be taken in drawing direct comparisons between region based on outstanding debt levels. Additional information on the SPER dataset including definitions and explanatory notes can be accessed through the data source URL link.

Notes: State Penalties Enforcement Registry (SPER) debts can start with unpaid fines and penalties, and can be referred to SPER by various agencies: courts, state government and other local government authorities. This data shows a breakdown of all types of debt registered with SPER, reported as at a current point in time (based on extract date). The top 10 offence groups for each SA4 region are included only. Where there is missing information for an offence group or SA4, that should not be interpreted as a count of 0 or an outstanding balance of 0, rather that the offence group category was not included in the top 10 offence group for that region. Therefore, totals are considered a count of the total for the top 10 offence groups only (based on outstanding balance).

This data is a breakdown of the outstanding debt based on current debtor addresses. As debtors may have multiple addresses registered with SPER, the allocation of debt to an SA4 region is based on their most current address available. It is possible that some debt may be reported under different SA4 regions over time, due to debtor relocation or identification of new address information by SPER. # ENERGY HARDSHIP

## 1) Number of hardship customers

## 2) Average debt of hardship program participants

The number of hardship customers has been rising since quarter 2 of 2022-23 (graph 1). The average debt of hardship program customers is higher than the average debt at the time of entry to a hardship program (graph 2). This indicates that debt levels are rising after entering a hardship program.

Definition Notes: **Children in care:** The provision of care outside the family home to children who are in need of protection or who require a safe placement while their protection and safety needs are assessed. In accordance with nationally agreed reporting definitions, data for children in care refers to children placed with kin, other home-based carers or residential care services. **Intake:** Refers to the process by which Child Safety receives and gathers information about harm or risk of harm to a child or an unborn child who may be at risk of harm after he or she is born and determines the appropriate response to the information received. Intake processes are initiated when professionals, family members or members of the public contact Regional Intake Services or Child Safety Service Centres with concerns about a child. **Notification:** A notification is recorded where there is a reasonable suspicion that a child is in need of protection, that is, a child has been significantly harmed, is being significantly harmed, or is at risk of significant harm, and does not have a parent able and willing to protect them. **Substantiated:** The outcome of an investigation and assessment where it is assessed that the child or young person has suffered, is suffering, or is at unacceptable risk of suffering future, significant harm.

Accessed at <https://www.aihw.gov.au/reports/youth-justice/youth-detention-population-in-australia-2023/data>. Data is for young people in detention on an average night, by age group, sex, Indigenous status and Australian states and territories. The youth detention data is for 'All detention' categories, including unsentenced detention and sentenced detention. The age on an average night each quarter is calculated based on the age a young person is each night that they are in detention. If a young person changes age during a period of detention, then the average nightly number in detention will reflect this. For example, where a young person turns 18 during a period of detention, any nights spent in detention (sentenced or unsentenced) aged 18 will only be counted in quarterly average nightly population for the 18+ age group. Similarly, nights spent in detention before a young person has turned 18 will only be counted in the 10–17 age group. Average nightly data broken down by age is not comparable to Youth detention population in Australia releases prior to 2020. The average nightly population is calculated by adding the duration (in nights) of each period of detention that falls within the quarter, and dividing the summed duration by the number of nights in the quarter. Components of tables may not sum to the totals due to rounding.

Note: Care should be taken when comparing monthly statistics, for example January 2014 compared with February 2014. A more accurate comparison would be obtained by comparing a longer time series, for example, one calendar year to the next, as this will account for seasonal variations. Should you require any assistance in interpreting these statistics, please contact Statistical Services, QPS. Offence counts are excluded where counts are greater than or equal to 1 and less than 5.
